Event Food Policy
with Allergy Awareness

In an attempt to create an allergy-aware environment for our students, food brought to school sponsored events involving students at St. Thomas Aquinas Catholic School should follow these guidelines.

1. Food should be purchased and not prepared at home; and
2. Food labels should be read to be sure the food contains no nuts and is not processed in a facility that handles nut products; and
3. Food should be served in original containers with original labels intact; and
4. When possible, individual serve packages should be used; and
5. If food is provided from outside vendors, care should be taken to determine that they are a “nut-free” facility. The vendor/s names will be available so that parents may make their own determination as to safety.
6. No policy exists with respect to beverages.
7. Parents must determine the safety of individual items and events for their own children.
